

What's new for 2018-19?

 **Family Learning**

Let's engineer!

A 3 week course for parents and children to enjoy together. Families will work together on STEM based challenges having the opportunity to problem solve, design, work as a team and have fun! Each week will be a new challenge for families to tackle for example 'build a boat that floats, the tallest tower, or a bridge that can hold the weight of a toy car.'

Let's do Lego!

A 3 week course for parents and children to enjoy together. Let's do LEGO is a fun way to engage children and parents with STEM subjects as well as problem solving, design and innovative thinking. Each week will be a new challenge for families to tackle such as build a LEGO catapult, a boat that floats, a LEGO marble maze, or even a LEGO volcano (that erupts!)

Unstoppable me- Growth Mindset

A 2 hr adult only course introducing the concept of Growth Mindset which is used in many schools to help children be more successful learners. Learners will find out what it is, how to develop it and strategies parents/ carers can use to increase their children's confidence, aspirations and belief in their own ability.
(Can be followed by 3 week Family Wellbeing course)

Speech & Language Development – in Early Years & Reception. (Target course)

A 5 week course for parents/ carers and their Children.
(Adults only for week 1)
The course uses animal themed games/ activities (incl. singing/ rhyme/ craft/ repetition) to encourage and develop speaking and listening skills. Learners will increase their skills and confidence to support their child's speech and language development at home.
